### EXPERIENCE

#### Developer (Freelance Startup)

##### MycroHarvest | Sept 2022 - Current

- Implemented initial wireframes and currently under development. Working through an organization called *EF* (Entrepreneurial First), helping the Co-Founders to bring the SPA to life.

#### Tool & Die Maker (Automation)

##### Magna International | 2020 - Current

- Optimized efficiency by programming the shortest possible paths with fluid motion and decreasing travel time by 30%.
- Negotiated between departments to prioritize deadlines and decrease known bottlenecks by 25%.
- Cultivated 5+ years of experience in an organized and precise manner. Working with pinpoint accuracy and diminutive measurements (.001" - .0005").

#### Tool & Die Maker (Stamping)

##### Magna International | 2015 - 2020

- Collaborated on several projects, that was driven by research and development, which exceeded \$750,000.
- Facilitated several projects and represented the company globally by providing on going support 6 days/week to major OEM's. Ranging anywhere from 4 to 8 weeks at any given time.
- Adapted to international business and managed to bridge gaps within language and cultural barriers to meet customers needs.

### PROJECTS

#### Portfolio Site | *September 2022*

- Official portfolio site, which was built on a React framework and has since been deployed along with a couple pieces in development.

#### *InStock | WorkFlow Environment Project | July 2022*

- A project that had agile based workflow environment.
- Figma wireframes were given with a Jira board where we had to collaborate and assign tickets with story points.
- Experience having been scrum leader, in teams of 4 conducting daily stand-up meetings.
